

HYDROSEAL™ Water Activated Tape is crafted from high-quality, renewable materials. This medium-duty tape forms a powerful, permanent bond with corrugated boxes, ensuring your packages stay sealed during transit, no matter the conditions.

- Secure**  
Our premium Kraft paper is triple reinforced with fiberglass strands so you can seal with one piece of tape.
- Customize**  
Enhance your brand experience with custom printing options. Add your logo, brand colors, or handling instructions directly onto the tape with up to 5 colors.

- Protect**  
Unlike traditional tapes, our reinforced water-activated adhesive penetrates deeply into cardboard fibers, creating a tamper-evident seal that protects against theft.
- Optimize**  
Speed up your packing process with our easy-to-use tape. It requires less tape per box compared to plastic tapes, reducing waste and saving time.

**IN STOCK NOW!**
